

SmarterVision

Software Engineers (Informatica, HBO-ICT specialisatie SE); Technische Informatici (Technische Informatica)

degeus@smartervision.nl

SmarterVision is a young and dynamic organization working on the frontiers of technology in IT, computer vision, and artificial intelligence. Our vision is that the ethical use of innovative, visual intelligence-based solutions can contribute to a humane and efficient society. Our mission is to extract reliable real-time information from videostreams to provide our customers with accurate alerts and advice concerning their operations. Our solutions are being successfully used in elderly-care, building-site security, bridge-operation safety, etc.

Startersfunctie in overleg

We are looking to strengthen our development team with a young software engineer with a passion for computer vision and artificial intelligence.

Requirements:

- Currently studying or recently finished computer science
- Experience with computer vision and in particular video analysis algorithms
- A passion for artificial intelligence
- Hands-on approach to designing and developing technical solutions
- Curious demeanor
- Independent worker
- Team player eager to learn and share learnings
